Experience

Commission on Elections (COMELEC), District 1 – IT Intern January 2026 – April 8, 2026

- Performed data verification, validation, and encoding of voter registration records to ensure accuracy, completeness, and consistency of information
- Assisted applicants by handling inquiries and explaining registration requirements, while supporting data collection and form completion processes
- Provided technical support by performing workstation hardware diagnostics, resolving Wi-Fi and LAN connectivity errors, and configuring local network setups to ensure uninterrupted office operations.

Semicolon Connects – Website Designer and Developer (*Part-Time - Remote*) April 2026 – Present

- Built and designed responsive websites for US-based clients using Wix Studio, Wix Harmony, WordPress, Kajabi, Kartra, and GoHighLevel, with API integrations for booking, payment, and email systems
- Implemented SEO optimization, lead capture forms, and membership / LMS configurations across multiple client builds while ensuring mobile and web responsiveness
- Collaborated with US-based clients across time zones through weekly project alignments, translating business needs into clean, conversion-focused website designs

Projects

Alerto MNL *(Full-Stack Developer)* January 2025 - May 2025

Github: https://github.com/CURRENT-THREATS-SIA/AlertoMNL

- Developed a mobile application using Expo Go, React Native, Typescript, and PHP for safety and awareness mobile application for Manila citizens featuring SOS button functionality that sends alerts to police officers within 3km radius, integrated crime mapping per station with an integration of Mapbox API with real-time data visualization of crime data in Manila.

BeanScan AI *(Full-Stack Developer)* June 2025 - December 2025

https://github.com/ElixirTgT-3/BeanScan-Application

- An AI mobile application that is built through Dart and Flutter that scans coffee beans to identify bean type and detects surface defects using deep learning with CNN and Fast R-CNN. Supports live camera and gallery input with offline inference.

Organizations

FlutterFlow Developer Group Manila - General Volunteer September 2024 - Present

- Tasked to manage the flow and presentation of the events.

Microsoft Student Community - PLM (Finance) August 2024 - Present

- Monitor and take notes of all transactions when it comes to expenses and outcomes.

Certifications

Software Engineer (*Saylor.org):* View Certificate
MS Excel for Beginners (*InnovPH):* View Certificate

Education

Pamantasan ng Lungsod ng Maynila August 2022 – Present (Expected Graduation: 2026)

Bachelor of Science in Information Technology (BSIT) - Manila, Philippines

- Cum Laude
